## **APPENDIX 5 – EXTRACTS FROM FIA APPENDIX L**

### **1. Helmets**

#### **1.1 Standards**

All drivers competing in rally special stages, entered on the FIA Calendar, must wear crash helmets which meet one of the standards listed in FIA Technical List N°25.

#### **1.2 Conditions of use**

Drivers and co-drivers in closed cockpit cars who wear full-face helmets must be able to pass the following test (1), in order to ensure that appropriate access to the airway of an injured driver is possible:

- the driver is to be seated in his car, with helmet and FIA approved head restraint in place and attached and safety harness buckled.
- with the help of two rescuers, the chief medical officer of the Event (or, if present, the FIA medical delegate), must be able to remove the helmet with the driver's head maintained permanently in a neutral position.

If this is impossible, the driver will be required to wear an openface helmet.

#### **1.3 Modifications**

No helmet may be modified from its specification as manufactured, except in compliance with instructions approved by the manufacturer and one of the FIA-listed standards organisations which certified the model concerned. Any other modification will render the helmet unacceptable for the requirements of the present Article 1.

#### **1.4 Maximum weight and communications systems**

Helmet weights may be checked at any time during an event and must not exceed 1800 g for a full-face type or 1600 g for an open-face type, including all accessories and attachments.

#### **1.5 Decoration**

Paint can react with helmet shell material and affect its protective capacity; therefore, where a manufacturer provides guidelines or restrictions on the painting or decoration of helmets, these must be followed, using only paint specified by them (air drying acrylic, polyurethane enamel or others) and preferably a painter having their approval. This is particularly important for injection-moulded shells, which are not usually suitable for painting.

The shell being painted should be efficiently masked, as paint penetrating the interior can affect the performance of the helmet liner.

Paints requiring heat curing should not be used and any process should not exceed the maximum temperature of conditioning of the helmet in the standard to which it is approved.

The manufacturer's instructions should also be consulted for any considerations on the use of stickers and transfers.

### **2. Flame-resistant clothing**

In special stages of rallies and selective events entered on the International Sporting Calendar, all drivers and co-drivers must wear overalls as well as gloves (optional for co-drivers), long underwear, a balaclava, socks and shoes homologated to the FIA 8856-2000 standard (Technical List N°27).

Users must ensure that garments are not too tight, as this reduces the level of protection. Embroidery sewn directly onto the overalls shall be stitched onto the outermost layer only, for better heat insulation. Backing material of badges and thread used for affixing them to the overalls must be flameproof (see Appendix 1 of the FIA 8856-2000 Standard for detailed requirements and instructions for use).

For events taking place in extreme heat, it is recommended that a cooling system be used (connected, for example, to the underwear designed for that purpose and homologated according to the FIA 8856-2000 standard).

Exceptionally, driver cooling vests which are not FIA homologated may be worn but shall be in addition to the mandatory homologated underwear. They must include a base garment certified and

## “52. SERBIA RALLY”

labelled to ISO 15025; any tubing must be certified and labelled to ISO 17493 and must not be in contact with the driver's skin, and any connection to an on-board system must comply with Article 5.8.6 of the FIA 8856-2000 standard.

### 3. Frontal Head Restraint (FHR)

**3.1** The wearing in an international event of any device intended to protect the head or neck and attached to the helmet is prohibited, unless the device has been homologated according to the FIA 8858 standard. Homologated FHR systems are listed in the FIA Technical List N° 29.

FIA-approved FHR systems must be worn by drivers in all International Events.

**3.2** Conditions of use FHR systems must be worn only with FIA-approved items according to the following chart:

| Helmet <sup>(2)</sup>           | Tether system<br>(tether, tether end fitting and helmet anchorage) |
|---------------------------------|--------------------------------------------------------------------|
| FIA 8860 (Technical List N° 33) |                                                                    |
| FIA 8858 (Technical List N° 41) | FIA 8858 (Technical List N° 29)                                    |

(2)Mandatory wearing of helmets in each championship according to Article 1.1 above.

For more details when the device used is the HANS®, the “Guide for the Use of HANS® in international motor sport”, published by the FIA Institute for Motor Sport Safety, can be found on [www.fia.com](http://www.fia.com), under the heading FIA Sport - Regulations - Drivers' Equipment.

**3.3** Compatibility and permitted use of items approved to the FIA 8858-2002, 8858-2010, 8860-2004 and 8860- 2010 standards.

The FIA 8860-2004 (Advanced helmets) and FIA 8858-2002 (FHR systems and compatible helmets) standards were updated in 2010.

Both the original and revised versions remain valid when used as shown on the chart below.
